PROFILE

Product designer with 13 years of experience, including 7 years designing Ingenious.Build, a B2B construction project management platform used by owners, contractors and design teams. I turn document-heavy, multi-step workflows (RFIs, approvals, field reporting) into clear, task-focused web and mobile products, working closely with product managers, engineers and domain experts from requirements to annotated specs.

EXPERIENCE

Ingenious Build 05.2019 – present · remote

PRODUCT DESIGNER · CONSTRUCTION SAAS · WEB & iOS

- Design core workflows of the platform, including RFIs, tasks, notifications and the home dashboard.
- Redesigned RFIs and Daily Logs for the new iOS app: 179 screens designed and annotated for engineering, 33 role-based action states for RFIs and 10 Daily Log categories on one consistent pattern.
- Translate product requirements and API constraints into prototypes and specifications that developers can build from, keeping parity across web and mobile.
- Work with product managers, engineers and construction experts to simplify multi-step, multi-stakeholder processes.

ServoCode 07.2017 – 04.2019 · Warsaw

UX/UI DESIGNER

- Designed responsive web and mobile applications for client products, with a strong focus on usability.

Kiwi Media 11.2015 – 07.2017 · Rzeszów

UX/UI DESIGNER

- Designed websites and digital products for commercial clients across multiple industries.

Inglot 10.2013 – 11.2015 · Przemyśl

UX/UI DESIGNER

- Designed e-commerce experiences and digital marketing assets for a global beauty brand.
