PROFILE

I have designed interfaces since 2013. Since 2019 I have led UX and UI for the Ingenious.Build platform (web and iOS), working every day with a US team. I do my best work on mobile apps, design systems and complex user journeys: from problem analysis and user flows, through wireframes, to final UI and interactive prototypes in Figma. I designed Tekma, a hiring app, end to end, and I use AI daily for concepts, variants, analysis and copy.

SELECTED PROJECTS

Tekma

Hiring app
designed end to end
tekma.app

Designed on my own from start to finish: rubrics, two independent scores before a decision, an AI notetaker, a candidate portal, a GDPR and AI Act panel and a 90-day plan after the offer. I also designed and coded the landing page. Early access.

Ingenious.Build

iOS and web app
construction, USA
since 2019

A new iOS app for construction project management. Based on the findings of our UX researcher I designed one RFI action banner instead of many, and one pattern for all Daily Log categories. Every screen has a UX note for developers and QA. The app is rolling out now.

179 annotated screens **33** RFI banner states **10** categories on 1 pattern

Vitro-Soft

Web app
IVF clinics
only designer

One medical history for the couple across the whole treatment, replacing paper and Excel. I worked with a doctor, an embryologist, a developer and the people who operate the system. Developers build the app from my component library. In use in selected clinics.

58 screens **13** printable documents **87** variants in 35 component sets

4Clubbers

Mobile PWA
music events
4clubbers.app

An app for electronic music fans, designed from scratch and live. The next version adds finding a crew for an event, event boards, chats with offline and failed-to-send states, and safety tools.

about 5,000 registered accounts **162** screens in MVP-2

BookGenius

Education app
subscription

Hotjar showed users skipping the paywall. I designed a 7-day trial guide with a reminder 2 days before the end, and for people who skip it, three strategies with an A/B test recommendation. The change is deployed.

+35% conversion after deployment

Warehouse

Web app
telecom, USA
NDA

For operators of automated picking and shipping. Each job shows its status before its numbers, and operators fix some problems in one click. Three levels: dashboard, job, device.

EXPERIENCE

05.2019 – present	**Ingenious.Build** · Product Designer A US construction project management platform, web and iOS. RFIs, Daily Logs, tasks, notifications and the dashboard. Remote, in English, with a PM, a UX researcher and developers.
07.2017 – 04.2019	**ServoCode** · UX/UI Designer Web and mobile apps for clients.
11.2015 – 07.2017	**Kiwi Media** · UX/UI Designer Websites and digital products for clients.
10.2013 – 11.2015	**Inglot** · UX/UI Designer The online store of a global cosmetics brand.
in parallel	**uxaudyt.pl** · UX audits of online stores My own service: purchase path analysis, heuristics and change recommendations for stores.

HOW I WORK

From problem to prototype
Requirements and research findings, user flows, wireframes, final UI and an interactive prototype.

AI in daily work
Claude, OpenAI and the Figma AI agent: concept exploration, analysis, variants and copy.

Error states and edge cases
A field error does not block saving, the message sits under the field and the typed data stays.

Accessibility
Contrast, focus states, clear messages and keyboard support according to WCAG.

Notes for developers and QA
Every screen has the reason for the decision and the API limits the team works from.

Tests instead of opinions
I prepare variants for A/B tests and defend decisions with data in front of the team.

SKILLS	Mobile apps (iOS, PWA), design systems and component libraries, information architecture, roles and permissions, prototyping, accessibility
TOOLS	Figma: components and variants, Auto Layout, Variables, libraries, prototypes · FigJam · Photoshop · Illustrator · HTML, CSS, JavaScript
AI	Claude, OpenAI, Figma AI agent
LANGUAGES	Polish (native), English (daily work with a US team since 2019)

PORTFOLIO	marcinbednarz.pl · three case studies are under NDA; I will send the password on request: kontakt@marcinbednarz.pl

I consent to the processing of my personal data for the purposes of the recruitment process, in accordance with Art. 6(1)(a) of Regulation (EU) 2016/679 of the European Parliament and of the Council of 27 April 2016 (GDPR).
