Marcin Bednarz

Senior Product Designer, complex B2B software

kontakt@marcinbednarz.pl, +48 534 154 230, Rzeszów, Poland (CET). I also work in US time zones. B2B contract or EOR.
Portfolio: **marcinbednarz.pl**. Password for NDA case studies: ***cJ-2Pds7J7aB4-q**

PROFILE

I am a product designer with 13 years of experience. For the last 7 years I have worked on Ingenious.Build, a project management platform for construction used by owners, contractors and design teams. I design web and mobile apps for construction, logistics and healthcare. I like work with many steps, roles and documents, like RFIs, approvals and daily reports. I work closely with product managers, developers and domain experts, from the requirements to specs that developers can build from.

EXPERIENCE

Ingenious Build — 05.2019 - now, remote

PRODUCT DESIGNER, CONSTRUCTION SOFTWARE, WEB AND iOS

- I design the main parts of the platform, including RFIs, tasks, notifications and the home dashboard.
- I redesigned RFIs and Daily Logs for the new iOS app. I designed and described 179 screens for developers, with 33 role-based states for RFIs and one pattern for all 10 Daily Log categories.
- I turn product requirements and API limits into prototypes and specs, and I keep web and mobile consistent.
- I work with product managers, developers and construction experts to make processes with many people and steps simpler.

ServoCode — 07.2017 - 04.2019, Warsaw

UX/UI DESIGNER

- I designed web and mobile apps for client products, with a focus on usability.

Kiwi Media — 11.2015 - 07.2017, Rzeszów

UX/UI DESIGNER

- I designed websites and digital products for clients from different industries.

Inglot — 10.2013 - 11.2015, Przemyśl

UX/UI DESIGNER

- I designed the online store and digital marketing materials for a global cosmetics brand.

OTHER PROJECTS

Vitro-Soft	Lead designer in the team that designed a web app for IVF clinics: medical histories, embryology, printouts and settings. 58 screens and a UI library.
4Clubbers	Live event app for electronic music fans. I designed the MVP-2 social features: crews, event boards, chats and safety tools (162 screens).

SKILLS AND TOOLS

Product design	Complex B2B workflows, information architecture, roles and permissions, interaction design, usability testing
I often work on	Mobile apps for field work, dashboards with a lot of data, web apps for companies, design systems, edge cases and error states
Tools	Figma, FigJam, Framer, Photoshop, Illustrator
AI	Claude, OpenAI and the Figma AI agent, for exploring options, summarising research and faster prototypes
Languages	Polish (native), English (B2, I work with US teams every day since 2019)
